Incident Name:

Factual Summary:

We have proof across multiple dimensions, from the generic, through the funding channels, to the gain of function research authorization itself, that SARS-CoV-2 or COVID-19, was a laboratory engineered airborne strategic biological weapon of mass destruction. We have proof of a global cover up to prevent the world from learning of this reality. We have proof that this bio-weapon has led to at least 23.9 million deaths to date, since its deployment in late 2019.

We have proof that the vaccines based upon inducing endogenous intracellular expression of this bio-weapon's most pathogenic fragment, both mRNA and adenovirus vector, are *also** bio-weapon, and that they have caused multiple tens of millions of deaths *separately** from the airborne bio-weapon, since their deployment in late 2020/early 2021. In short, we have proof that we are in the midst of a major global genocide, and a solid contender for the #1 spot - the single greatest extermination of humanity ever recorded.

My name is Tom Czerniawski. I will swear under oath that all of this is true. I reside at 128 Canillo Place, Mississauga, Ontario, Canada. Postal code: L5A 1M5. Home phone: 1 905 275 4267.

1. SARS-CoV-2 is an American-created recombinant bat vaccine, or its precursor virus. It was created by an Ecoinhealth Alliance program at the Warner Institute of Virology (WIV), as suggested by the reporting surrounding the lab leak hypothesis. The details of this program have been concealed since the pandemic began. These details can be found in the Ecoinhealth Alliance program report, "The Ecoinhealth Alliance program Broad Agency Announcement (BAA) H0001850031", dated March 2018 - a document not yet publicly disclosed.

The contents of the proposed program are extremely detailed. Peter Daszak lays out step-by-step what the organization intends to do by phase and by location. The primary scientists involved, their roles, and their institutions are included. The funding plan for the WIV work is its own document. The reasons why nonpharmaceutical interventions like masks and medical countermeasures like the mRNA vaccines do not work well can be extrapolated from the data. The reasons why the early treatment protocols work as curatives are apparent.

SARS-CoV-2's form as it emerged is likely as a precursor, deliberately virulent, humanized recombinant SARS-CoV that was to be reverse engineered into a live attenuated SARS-CoV-like vaccine. Its nature can be determined from analysis of its genome with the context provided by the Ecoinhealth Alliance program report. The details of this work will go into intelligence collections on Wuhan will aid this determination.
